# PATRIARCHATUS HIEROSOLYMITANUS

*Cujus descriptionem tentabat  
DIANVILLE Geographus Regius,  
Anno Erae Chr<sup>nae</sup> MDCCXXXII. mensis Mayo.*

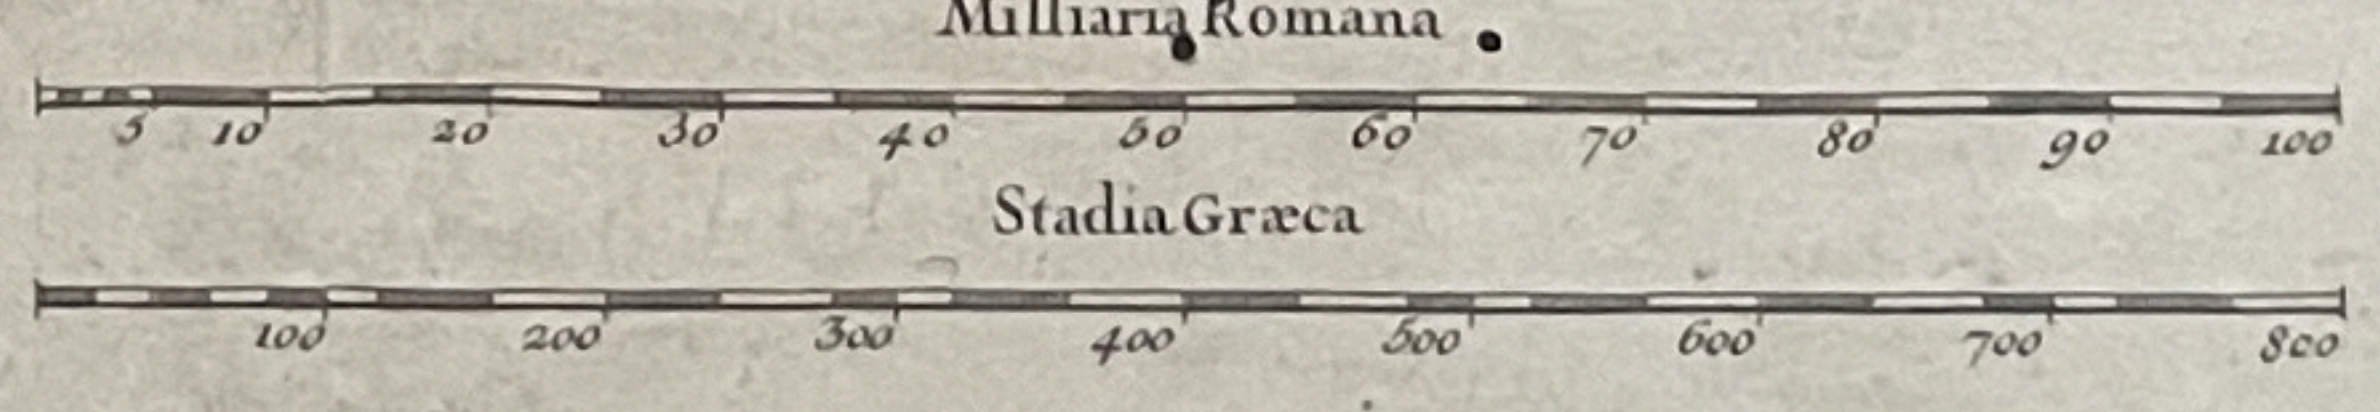

I PALÆSTINA PRIMA  
II SECUNDA  
III TERTIA

CUM hæc Geographica descriptio, diligenti studio et summa cura  
et diuturnata, eoque studium illud et omnis cura, deventerit,  
ut Tabula, existeret ab us, quæ hactenus prodierunt, plurimum discrepans,  
præsertim quoad Palæstinæ magnitudinem, operæ pretium fore visum est,  
diversas Distantias, quæ sunt univ. so operi quasi substructa basis  
et fundamentum, intra ipsum Tabulæ finem, exprimere.  
Sola tamen notare decrevimus, inter vallia quæ Petrus assignare,  
quamquam multa, adhuc innotuerunt, à Recentioribus consignata,  
nec minus prope accurata, quam quæ à Veteribus tradita sunt.  
Ac licet in regione fere ubique montuosa et aspera, cuiusmodi ea est  
nam describimus, Distantias illas, lineæ rectâ tantis assumere,  
quæ traduntur, non conveniret, tamen ne ab us, qui idem argumentum  
tractare, levis, et excederemus, ubique fere pro quinque et septuaginta  
Milliariis, non fere, quam octoginta intra Gradus unius, limitem  
consecimus. Ac, quando plura dedimus, pro certo haberi debet,  
numquam id fecisse, nec, nisi coactis manifesta soli difficultate,  
aut longiorum, compl. zione intervallorum, quæ, si singularem  
explicata fuissent, hæc, sent curculis et angustis peculiaribus,  
quales alibi ex Distantiis particulatim expositis, resultant.  
Ceterum, sine mutatione aut ullo discrimine, ad omnes quotquot  
numeramus Distantias, Tabulam istam, expressimus, quarum Distantiarum  
veritatem ac fidem, eorumdem collatio et concordia, prout hic exhibetur,  
ratio declarat. Solum intervallum Neopolim inter et Bethleem delict,  
quod haud tantum, exporrigendū fuit, quantum statutus  
in Tabulâ, Milliarius numerus, postulare videtur.  
Itaque, hæc, hic Distantiarum seu intervallorum, seriem  
et connexionem, quandam, à Mari Rubro et Egypti finibus,  
ad Syonem et Hierosolimam, quæ major etiam appareret,  
Distantia, ex Recentioribus petite, accessissent.  
SOLYM. sola est, cuius situs ex Latitudine seu recessu ab Equatore  
determinatur, sit. Eiusdem urbis, atque adeo totius regionis, positionem  
in Longitudine, dedit, Alexandrinæ Egyptiæ et Kairi Longitudo,  
utraq. Astronomicis observationibus explorata.  
Inde autem quidquid Pelusium u. ne patet et Casium,  
quod in Tabulæ margine adscriptum, id totum ex diversis Distantiis,  
à Veteribus accurate finitis ratio perspicuum  
et stabilium esse censetur.
